Technical drawing of a reinforced concrete slab (soletta) with dimensions and reinforcement details.

Overall dimensions: 560 cm (width) x 560 cm (depth).

Reinforcement details:

- soletta in c.a. sp. 15cm
- armata con 2 x rete e.s. Ø10/15x15cm
- ancoraggio perimetrale in barre Ø10/40cm

The drawing shows a grid of reinforcement bars (Ø10/15x15cm) and a perimeter anchorage (ancoraggio perimetrale in barre Ø10/40cm). The slab is supported by four circular columns. The reinforcement is shown in cross-section (e.s.) and top view (p.p.).

Technical drawing of the 'Sedile 37 pz' (37 seats) bench. The main elevation shows a long bench with a total length of 560 cm and a base width of 451 cm. It features 37 seats with a 12 cm pitch. The bench is supported by four legs. A section view on the right shows a square seat cushion measuring 60 cm by 60 cm, with a 10 cm thick base and a 10 cm thick seat cushion. The section is labeled 'Sezione tipo scale 1/20' and 'Sedile 37 pz'.

The diagram illustrates a 3-level hierarchical structure. On the left, three boxes are labeled 'superiori', 'intermedi', and 'inferiori'. To the right, a large rectangle is divided into three horizontal sections. The top section is labeled '4018 L=594'. The middle section is labeled '228 L=546'. The bottom section is labeled '4018 L=594'. A small 'x' is located at the top left of the middle section. The entire structure is enclosed in a dashed border.

Technical drawing of a rectangular table with a cross-hatched top and a central white area. The table has a width of 560 and a height of 927. The central area is labeled 'T1' on the left and 'T2' on the right, both with dimensions 'Trave in c.a. R 60x60cm'. The table is surrounded by a decorative border with circular and square motifs. Dimensions 108, 334, 118, 200, 300, and 560 are indicated.

Technical drawing of a reinforced concrete slab (pavimento) showing a plan view and a cross-section.

**Plan View:**

- Overall width: 60
- Overall length: 367
- Support wall thickness: 10 (on both ends)
- Reinforcement: staffe 18pz, passo 15cm

**Cross-section (Sezione Tipo):**

- Slab thickness: 60
- Reinforcement: 18 bars, spaced at 15 cm (18pz, passo 15cm)
- Detail: 10 (bar diameter), 15 (spacing)

The diagram illustrates the distribution of 1000 subjects across three groups. The groups are labeled on the left: "superiori", "intermedi", and "inferiori". The corresponding values for each group are shown on the right: "4018 L=411" for "superiori", "209 L=353" for "intermedi", and "4018 L=411" for "inferiori". The groups are represented by horizontal bars of different colors: light blue for "superiori", light green for "intermedi", and light red for "inferiori". The bars are stacked vertically, with "superiori" at the top, "intermedi" in the middle, and "inferiori" at the bottom. The total number of subjects is 1000, which is the sum of the subjects in each group (4018 + 209 + 4018).
